Columbia, SC 29211

RE:Docket No. 2005-385 on the consideration of implementing the requirements of Section 1251 (Net Metering and Additional Standards of the Energy Policy Act of 2005.

In order for our country to allow future generations to have a standard of living similar to or better than ours, we must begin to further develop and utilize sustainable sources of energy. In our climate, solar energy can be used to generate a significant percent of our power needs. However, to give an impetus for developing generation at a level that is significant, we need to join the majority of the other states in the USA by having "net metering" laws and rules. I hope that the PSC will make every possible effort to support the citizens by implementing such standards.

Harry K. McMillan
